

Notes for use with these guidelines

IJF can be used for CAT B and CAT C materials
NPI must be used for alternative thicknesses, colours,
adhesives and own label cores

We are unable to offer shrink wrapping or blister packing

If you require a different liner than those specified on the
CAT C sheet as possible this will require an NPV

Own Label cores – Origination costs are in the region of
€3,000 and minimum quantity will be equal to 25,000 rolls at
25mm wide.

Standard Lengths are as CAT A logs

CAT A: Materials and descriptions

Material	Material description
105735	3024 White Log 3.3mm x 1150mm x 9m

CAT B: Rolls

Foam Rolls:

Slit from Category A Logs - Minimum width slit 5mm (smaller will have to be trialled) increase 1mm increments

Lead Time - Dispatch within 5 days for 1 log quantity or less

Products	Core mm	Label	Packaging	Widths mm	MOQ
Slit from CAT A logs	76mm white plastic except 3829/3824 and 3909 which have a cardboard Scapa Core	Scapa	Loose in plain brown carton	Minimum width is 5mm. The maximum is the usable width of the log Note - we cannot slit rolls narrower than the material thickness as it becomes unstable	1 Carton 500mm high To Calculate carton quantity = 500 /required width

AFT Rolls:

Products	Core mm	Label	Packaging	Widths mm	MOQ
Slit from CAT A logs	76mm white plastic	Scapa	Loose in plain brown carton	Minimum width is 6mm. The maximum is the usable width of the log	1 carton at 80mm high (for widths up to 25mm). And 1 carton at 160mm high for widths >25mm.

CAT C: alternative liners for double sided foam products
