Safety Opportunities

During the month of January:

- The Windsor site experienced one first-aid only injury related to lifting goods in confined/restricted quarters (back pain/spasms).
- The Windsor site also experienced one OSHA recordable back sprain injury attributed to lifting of a drum pump which resulted in restricted work duty.
- Also, a previous lifting related injury from November 2010 (hernia) has now resulted in 12 days lost time in January for recuperation after corrective surgery.
- Two new Lab/Technical employees completed their induction training for Hazard Communication, Emergency Evacuation, Job Hazard Assessment and Chemical Hygiene Program training .
- Special emphasis Static Bonding and Grounding for Flammable Liquids re-fresher training was conducted for all site Coating and Mixing personnel on all shifts.
