To All PIB Kalfass/Packing Operatives

Items 139960 (2515) & 139961 (2525) for Silec

Batch numbers on coil labels & carton labels

We have had a complaint from Silec for 2525 coils due to the batch number on the coil label being different to the batch number on the carton label. This appears to be due to the batch number on the coil label printer not being changed at a shift change hand-over.

For items **139960** & **139961** for Silec, can I kindly ask PIB Kalfass/Packing Operatives to:

- **Please check and ensure batch number on coil label and carton label are the same**
- Please annotate and sign the relevant production order to confirm they both match.

Also, please remember that the date of manufacture printed on the coil label should be in **month/year** format e.g. **05/11** (for coil labels done during May 2011).

Thanks for you help,
