

EUROPEAN TECHNICAL SERVICE **announcement**

I am pleased to announce that **Giuseppe Maffe**, currently in charge of quality support and process engineering at our Ghislarengo plant, will join the European Technical Service team from 1 November 2009.

Giuseppe will provide technical support to the European automotive sales team and to an industrial market/area, which will be specified once the conclusions of “remodel team” are announced.

Giuseppe’s knowledge of manufacturing process, quality and customer requirements, especially in the automotive harness business, will enable him to be quickly effective in his new role.

Giuseppe will work from the Ghislarengo site and will report to the undersigned. A separate announcement regarding the quality support and process engineering role in Italy will be made at a later date by the Italian Operations team.

Please join me in welcoming Giuseppe to the team and wishing him success in his new position.

Christophe Chauvin
European Technical Service Manager

6 August 2009
